

Manuscript no. HAEMATOL 2010/022368 **entitled:** “Role of NOXA and its ubiquitination in proteasome inhibitor-induced apoptosis in chronic lymphocytic leukemia cells“ **Authors:** Maria Baou, Susan L Kohlhaas, Michael Butterworth, Meike Vogler, David Dinsdale, Renata Walewska, Aneela Majid, Eric Eldering, Martin JS Dyer and Gerald M. Cohen

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:

• **Name Surname, affiliation, email address** Professor G. M. Cohen, MRC Toxicology Unit, University of Leicester, gmc2@le.ac.uk

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”. The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Name Surname...Baou, Dyer and Cohen.

3) Design & Methods. The following authors were responsible for specific investigations (please detail): Baou, Kohlhaas and Vogler were responsible for research and contributed to data analysis. Walewska and Majid contributed with patient samples and analysis. Eldering provided some analytic tools and helped manuscript writing. Dyer contributed with patient data and manuscript writing. Cohen designed research and contributed to data analysis and manuscript writing.

4) Results. The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table):

- Baou, Kohlhaas and Vogler were responsible for Figure 1.
- Baou was responsible for Figure 2.
- Dinsdale was responsible for Figure 3.

Baou and Butterworth were responsible for Figure 4.

Baou and Butterworth were responsible for Figure 5.

Baou was responsible for Figure 6.

5) Writing the manuscript. The following authors were responsible for writing the manuscript: Baou, Kohlhaas, Butterworth, Vogler, Dinsdale, Walewska, Majid, Eldering, Dyer and Cohen

6) Contributors Listed in Acknowledgments: (Examples of those who might be acknowledged include a person who provided purely technical help, writing assistance, or a department chair who provided only general support. Corresponding authors must declare whether they had assistance with the study design, data collection, data analysis, or manuscript preparation. If such assistance was available, the authors must disclose the identity of the individuals who provided this assistance and the entity that supported it. Financial and material support should also be acknowledged.)

Judy McWilliam helped with preparation of samples for electron Microscopy
Drs Bohmann and Stevenson provided the ubiquitin bearing plasmids, pM107 and Ubiquitin mutant (K- R mut), respectively. The work was supported by Leukaemia & Lymphoma Research and the Medical Research Council.
