

Manuscript no. HAEMATOL/2010/027920 entitled "TET2 gene is not deleted in chronic myelomonocytic leukemia: a FISH retrospective study" Authors: Mar Mallo, Gemma Osca, Julia Solórzano, Leonor Arenillas, Lourdes Florensa, and Francesc Solé

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:

- **Mar Mallo**, Laboratori de Citogenètica Molecular, Laboratori de Citologia Hematològica, Servei de Patologia, Parc de Salut Mar, GRETNHE, IMIM-Hospital del Mar, Barcelona, Spain; ²Departament de Biologia Cel·lular, Fisiologia i Immunologia, Facultat de Biociències, Universitat Autònoma de Barcelona, Bellaterra, Spain, mar.mallo@gmail.com

- **Francesc Solé**, Laboratori de Citogenètica Molecular, Laboratori de Citologia Hematològica, Servei de Patologia, Parc de Salut Mar, GRETNHE, IMIM-Hospital del Mar, Barcelona, Spain; ²Departament de Biologia Cel·lular, Fisiologia i Immunologia, Facultat de Biociències, Universitat Autònoma de Barcelona, Bellaterra, Spain, mar.mallo@gmail.com

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html): "Authorship credit should be based on: 1) *substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data*; 2) *drafting the article or revising it critically for important intellectual content*; and 3) *final approval of the version to be published*. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship".

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the **conception of the study**: Mar Mallo, Francesc Solé

3) **Design & Methods**. The following authors were responsible for specific investigations (please detail):

- Mar Mallo was/were responsible for collection of all the samples, as well as, FISH technique and analysis. She also performed the probe design.
- Gemma Osca was/were responsible for collection of all the samples, as well as, FISH technique and analysis.
- Julia Solórzano was/were responsible for collection of all the samples, as well as, FISH technique and analysis.
- Leonor Arenillas was/were responsible for the final diagnosis.
- Lourdes Florensa was/were responsible for the final diagnosis.
- Francesc Solé was/were responsible of the design, coordination, collection of all the samples and the cytogenetic analysis.

4) **Results**. The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table):

- Gemma Osca was/were responsible for Table1.
- Julia Solórzano was/were responsible for Table1.
- Francesc Solé was/were responsible for Table1.

5) **Writing the manuscript.** The following authors were responsible for writing the manuscript:

- Mar Mallo was/were responsible for the writing of the manuscript.
- Gemma Osca was/were responsible for the writing of the manuscript.
- Julia Solórzano was/were responsible for the writing of the manuscript.
- Leonor Arenillas was/were responsible for the critical review of the manuscript.
- Lourdes Florensa was/were responsible for the critical review of the manuscript.
- Francesc Solé was/were responsible for the writing of the manuscript.

6) **Contributors Listed in Acknowledgments:** (Examples of those who might be acknowledged include a person who provided purely technical help, writing assistance, or a department chair who provided only general support. Corresponding authors must declare whether they had assistance with the study design, data collection, data analysis, or manuscript preparation. If such assistance was available, the authors must disclose the identity of the individuals who provided this assistance and the entity that supported it. Financial and material support should also be acknowledged.)

Blanca Espinet and Marta Salido performed the cytogenetic analysis.
Carme Melero and María Rodríguez-Rivera processed the samples for the following cytogenetic analysis.

Regarding Funding: This work has been partially supported by grants from Instituto de Salud Carlos III, Ministerio de Sanidad y Consumo, Spain (FI07/00107 and PI07/1009) and Ministerio de Ciencia e Innovación, Red Temática de Investigación Cooperativa en Cáncer (RTICC): RD07/0020/2004 FEDER.
