

**Manuscript no. HEMATOL/2010/025106 entitled "Fetal alloimmune thrombocytopenia and maternal immunoglobulin G infusions"**

**Authors: Günther Giers, Folker Wenzel, Markus Stockschläder, Regina Riethmacher, Horst Lorenz, Boris Tutschek**

**Information about the contributions of each person named as having participated in the study**

**1) Guarantor(s)**, i.e., person(s) who is (are) responsible for the integrity of the work as a whole:

- Giers, Günther, Clinical Hemostaseology and Transfusion Medicine, University Hospital Düsseldorf, email address: giers@uni-duesseldorf.de

According to the International Committee of Medical Journal Editors (ICMJE)

([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)): "Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 ..... Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship".

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the **conception of the study**: Boris Tutschek, University Hospital Bern, Switzerland and Medical Faculty, Heinrich Heine University Düsseldorf, Germany

3) **Design & Methods**. The following authors were responsible for specific investigations (please detail): **please see List 1 below**

4) **Results**. The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table): **please see List 1 below**

5) **Writing the manuscript**. The following authors were responsible for writing the manuscript: **please see List 1 below**

6) **Contributors Listed in Acknowledgments**: (Examples of those who might be acknowledged include a person who provided purely technical help, writing assistance, or a department chair who provided only general support. Corresponding authors must declare whether they had assistance with the study design, data collection, data analysis, or manuscript preparation. If such assistance was available, the authors must disclose the identity of the individuals who provided this assistance and the entity that supported it. Financial and material support should also be acknowledged.) **please see List 1 below**

## List 1

**Contributors:** GG was the principal investigator, was directly involved in the clinical care of the patients and performed the data collection. GG and BT contributed equally to study design, study conduct, data analysis and writing of the manuscript. FW, MS, HL and RR contributed to study conduct, data analysis and writing of the manuscript. All authors saw and approved the final version of this manuscript.
