

Manuscript no. HAEMATOL/2011/053199 entitled “Plasma thymus and activation-regulated chemokine as an early response marker in classical Hodgkin lymphoma”

Authors: Wouter J. Plattel, Anke van den Berg, Lydia Visser, Anne M. van der Graaf, Jan Pruim, Hans Vos, Bouke G. Hepkema, Arjan Diepstra, and Gustaaf W. van Imhoff

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:

- Wouter J. Plattel, University Medical Center Groningen, Departments of Hematology and pathology and Medical Biology, w.j.plattel@umcg.nl
- Gustaaf W. van Imhoff, University Medical Center Groningen, Departments of Hematology, g.w.van.imhoff@int.umcg.nl

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html): “Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study:

- Wouter J. Plattel, University Medical Center Groningen, Departments of Hematology and Pathology and Medical Biology.
- Anke van den Berg, University Medical Center Groningen, Departments Pathology and Medical Biology
- Lydia Visser, University Medical Center Groningen, Departments Pathology and Medical Biology.
- Arjan Diepstra, University Medical Center Groningen, Departments Pathology and Medical Biology.
- Gustaaf W. van Imhoff, University Medical Center Groningen, Departments of Hematology.

3) Design & Methods. The following authors were responsible for specific investigations:

- Wouter J. Plattel, Anke van den Berg, Lydia Visser, Bouke G. Hepkema, Arjan Diepstra, and Gustaaf W. van Imhoff were responsible for the study design.
- Wouter J. Plattel, Anke van den Berg and Gustaaf W. van Imhoff were responsible for the collection of clinical data.
- Wouter J. Plattel, Anke van den Berg, Lydia Visser and Hans Vos were responsible for plasma TARC collection and analysis.
- Wouter J. Plattel, Lydia Visser and Arjan Diepstra were responsible for TARC immunohistochemistry.
- Wouter J. Plattel and Jan Pruim were responsible for the quantification and interpretation of FDG-PET images.
- Wouter J. Plattel, Anke van den Berg, Lydia Visser, Arjan Diepstra, and Gustaaf W. van Imhoff were responsible for the data interpretation and statistical analysis.

4) **Results.** The following authors were responsible for specific portions of the results, including figures and tables:

- Wouter J. Plattel, Anke van den Berg, Lydia Visser, Arjan Diepstra, and Gustaaf W. van Imhoff were responsible for the data interpretation.
- Wouter J. Plattel, Anke van den Berg and Gustaaf W. van Imhoff were responsible for all tables and figures.

5) **Writing the manuscript.** The following authors were responsible for writing the manuscript:

- Wouter J. Plattel, Anke van den Berg, Lydia Visser, Arjan Diepstra, and Gustaaf W. van Imhoff were responsible for the complete manuscript writing.

6) **Contributors Listed in Acknowledgments:** This research is supported by the Dutch Cancer Society (Grant no. RUG 2010-4860) and the Dutch Organization of Scientific Research (NOW ZonMW Grant no. 92003569).

Then I would like to acknowledge Aafke Zeilstra (University Medical Center Groningen, Department of Nuclear Medicine and Molecular Imaging) for reconstructing the FDG-PET studies and Tneke Van der Wal (University Medical Center Groningen, Department of Hematology) for monitoring outpatient clinic visits and assurgi serial plasma collection among the participating patients.
