Manuscript no. HAEMATOL/2011/056556 entitled “Platelet adhesion to decorin but not collagen I correlates with the integrin α2 dimorphism E534K, the basis of the human platelet alloantigen (HPA)-5 system”

Authors: Thomas J. Kunicki, Shirley A. Williams, Daniel Diaz, Richard W. Farndale, and Diane J. Nugent

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:
   • Thomas J. Kunicki, CHOC Children’s Hospital, tkunicki@choc.org
   • Diane J. Nugent, CHOC Children’s Hospital, dnugent@choc.org

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 …………………… Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Thomas Kunicki & Diane Nugent

3) Design & Methods. The following authors were responsible for specific investigations (please detail):
   • Thomas Kunicki, Shirley Williams and Diane Nugent were responsible for design, implementation and interpretation of genotyping, platelet adhesion assays, and hematologic assays.
   • Dan Diaz was responsible for implementation and troubleshooting of platelet adhesion assays and hematologic assays.
   • Richard Farndale was responsible for design, implementation, and interpretation of inhibition assays.

4) Results. The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table):
   • Thomas Kunicki and Diane Nugent were responsible for results in Table 1, Figures 1 and 2.
   • Shirley Williams and Dan Diaz were responsible for results in Table 1.
   • Richard Farndale was responsible for results in Figure 2.

5) Writing the manuscript. The following authors were responsible for writing the manuscript:
   • Thomas Kunicki, Shirley Williams, Dan Diaz, Richard Farndale, and Diane Nugent were responsible for writing, editing the initial manuscript and rewriting the revised manuscript.

6) Contributors Listed in Acknowledgments: NONE
