Manuscript no. HAEMATOL/2011/054916 entitled “Induction of insulin resistance by the adipokines resistin, leptin, PAI-1 and RPB4 in human megakaryocytes”

Authors: Anja J. Gerrits, Eelo Gitz, Cornelis A. Koekman, Frank L. Visseren, Timon W. van Haeften, Jan Willem Akkerman.

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:
   • Akkerman, Jan Willem, Dept. of Clinical Chemistry and Haematology, University Medical Center Utrecht, The Netherlands, j.w.n.akkerman@umcutrecht.nl

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 …………………… Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Anja J. Gerrits

3) Design & Methods. The following authors were responsible for specific investigations:
   • Anja J. Gerrits wrote the manuscript and performed the studies with patient material, controls and primary megakaryocytes
   • Eelo Gitz did measurements of Ca2+ mobilization and blotting
   • Cornelis A. Koekman did blotting and performed studies with patient material
   • Frank L. Visseren helped with data analysis and interpretation
   • Timon W. van Haeften recruited the patients, helped with data analysis and interpretation
   • Jan Willem Akkerman coordinated the project and wrote the manuscript.

4) Results. The following authors were responsible for specific portions of the results, including figures and tables:
   • Anja J. Gerrits wrote the manuscript and performed the studies with patient material, controls and primary megakaryocytes.
   • Eelo Gitz did measurements of Ca2+ mobilization and blotting
   • Cornelis A. Koekman did blotting and performed studies with patient material
   • Frank L. Visseren helped with data analysis and interpretation
   • Timon W. van Haeften recruited the patients, helped with data analysis and interpretation
   • Jan Willem Akkerman coordinated the project and wrote the manuscript

5) Writing the manuscript. The following authors were responsible for writing the manuscript:
   • Anja J. Gerrits wrote the manuscript and performed the studies with patient material, controls and primary megakaryocytes
   • Eelo Gitz did measurements of Ca2+ mobilization and blotting
   • Cornelis A. Koekman did blotting and performed studies with patient material
   • Frank L. Visseren helped with data analysis and interpretation
   • Timon W. van Haeften recruited the patients, helped with data analysis and interpretation
   • Jan Willem coordinated the project and wrote the manuscript
6) Contributors Listed in Acknowledgments:
The cooperation of patients and control subjects is gratefully acknowledged. This study was supported by the Dutch Diabetes Research Foundation (grant 2004.00.029) and the Netherlands Thrombosis Foundation (2006-1). The authors would like to thank Prof. Dr. G. Strous and Dr. E. Tournoij for scientific advice.
