

**Manuscript no. HAEMATOL/2011/055715 entitled “The impact of cyclin D1 mRNA isoforms, morphology and p53 in mantle cell lymphoma: p53 alterations and blastoid morphology are strong predictors of a high proliferation index”**

**Authors: Julia Slotta-Huspenina, Ina Koch, Laurence de Leval, Gisela Keller, Margit Klier, Karin Bink, Marcus Kremer, Mark Raffeld, Falko Fend, and Leticia Quintanilla-Martinez**

**Information about the contributions of each person named as having participated in the study**

**1) Guarantor(s)**, i.e., person(s) who is (are) responsible for the integrity of the work as a whole:  
• Leticia Quintanilla-Martinez, Institute of Pathology, University Hospital Tübingen, Tübingen, Germany. Leticia.quintanilla-fend@med.uni-tuebingen.de

According to the International Committee of Medical Journal Editors (ICMJE) ([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)): “*Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 ..... Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship*”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

**2) Authors who participated in the conception of the study:** Julia Slotta-Huspenina, Margit Klier, Mark Raffeld, Falko Fend, Leticia Quintanilla-Martinez

**3) Design & Methods.** The following authors were responsible for specific investigations (please detail):

- Julia Slotta-Huspenina, Ina Koch, and Margit Klier were responsible for designing and performing the qRT-PCR assays
- Gisela Keller was responsible for mutational analysis
- Karin Bink was responsible for the FISH analyses
- Julia Slotta-Huspenina, Laurence de Leval, Marcus Kremer, Falko Fend and Leticia Quintanilla-Martinez were responsible for the selection and pathological analysis of primary cases

**4) Results.** The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table):

- Julia Slotta-Huspenina, Falko Fend and Leticia Quintanilla-Martinez were responsible for Table 1 and Figs 1
- Julia Slotta-Huspenina and Leticia Quintanilla-Martinez were responsible for Figs 2 - 4
- Julia Slotta-Huspenina, Laurence de Leval, Marcus Kremer, Falko Fend and Leticia Quintanilla-Martinez were responsible for classification of cases
- Julia Slotta-Huspenina, Ina Koch, Margit Klier were responsible for the qRTPCR results
- Julia Slotta-Huspenina, Falko Fend and Leticia Quintanilla-Martinez were responsible for MIB1 and p53 counts
- Karin Bink was responsible for FISH results
- Gisela Keller was responsible for mutation analyses

**5) Writing the manuscript.** The following authors were responsible for writing the manuscript:

- Julia Slotta-Huspenina, Falko Fend, Mark Raffeld and Leticia Quintanilla-Martinez were responsible for writing the manuscript

**6) Contributors Listed in Acknowledgments:**

This work was supported by the a Grant of the Mantle Cell Lymphoma Consortium, Lymphoma Research Foundation, NY (to LQM) and a grant for female graduate students from the Technical University Munich to JSH.
