Manuscript no. HAEMATOL/2012/062844 entitled “Selection pressure exerted by imatinib therapy leads to disparate outcomes of imatinib discontinuation trials“

Authors: Min Tang, Jasmine Foo, Mithat Gonen, Joëlle Guilhot, François-Xavier Mahon, and Franziska Michor1

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:
• Franziska Michor, Dana-Farber Cancer Institute, michor@jimmy.harvard.edu

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 ................. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Min Tang, Jasmine Foo, François-Xavier Mahon, Franziska Michor

3) Design & Methods. The following authors were responsible for specific investigations:
• Min Tang
• Jasmine Foo
• Mithat Gonen
• Franziska Michor

4) Results. The following authors were responsible for specific portions of the results, including figures and tables:
• Min Tang
• Jasmine Foo

5) Writing the manuscript. The following authors were responsible for writing the manuscript:
• Min Tang
• Jasmine Foo
• Mithat Gonen
• Joelle Guilhot
• François-Xavier Mahon
• Franziska Michor

6) Contributors Listed in Acknowledgments:
Acknowledgments: the authors would like to thank Subhajyoti De, Yi Li, Giovanni Parmigiani, and Eric V. Slud for discussion and comments
