

Manuscript no. HAEMATOL/2012/071506 entitled “Molecular similarity between myelodysplastic form of chronic myelomonocytic leukemia and refractory anemia with ring sideroblasts”

Authors: Véronique Gelsi-Boyer, Nathalie Cervera, François Bertucci, Mandy Brecqueville, Pascal Finetti, Anne Murati, Christine Arnoulet, Marie-Joelle Mozziconacci, Ken I. Mills, Nicholas C. P. Cross, Norbert Vey and Daniel Birnbaum

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:

- Véronique Gelsi-Boyer, Centre de Recherche en Cancérologie de Marseille; Laboratoire d’Oncologie Moléculaire; UMR1068 Inserm; Institut Paoli-Calmettes; Marseille, France.gelsiv@ipc.unicancer.fr
- Daniel Birnbaum, Centre de Recherche en Cancérologie de Marseille; Laboratoire d’Oncologie Moléculaire; UMR1068 Inserm; Institut Paoli-Calmettes; Marseille, France.daniel.birnbaum@inserm.fr

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Véronique Gelsi-Boyer, Norbert Vey and Daniel Birnbaum

3) Design & Methods. The following authors were responsible for specific investigations:

- Nathalie Cervera did sequencing and established gene expression profiles
- Mandy Brecqueville did sequencing
- Anne Murati and Christine Arnoulet performed clinical and hematological data analyses
- Marie-Joëlle Mozziconacci did cytogenetical data analyses

4) Results. The following authors were responsible for specific portions of the results, including figures and tables:

- Véronique Gelsi-Boyer : result of sequencing and microarray data analyses, Figure 4, Supplementary tables 1, 3, 5, 6
- Nathalie Cervera: sequencing and data microarray analysis. Figures 1, 2, 3, Supplementary Tables 2 and 4, Supplementary Figures 1, 2, 4, 5
- François Bertucci: data microarray analyses
- Pascal Finetti: data microarray analyses
- Ken Mills: data microarray analyses
- Nicholas C.P Cross: data microarray analyses and sequencing data
- Daniel Birnbaum: result of sequencing and data microarray analyses, Supplementary Figure 3

5) Writing the manuscript. The following authors were responsible for writing the manuscript:

- Veronique Gelsi-Boyer was responsible for writing the introduction, the design and method except the part of gene expression profiling, results and part of the discussion

- Daniel Birnbaum was responsible for writing the discussion and revised all the manuscript
- François Bertucci was responsible for writing the gene expression profiling in the part of design and methods
- Norbert Vey revised the article critically

6) Contributors Listed in Acknowledgments:

Not applicable
