

Manuscript no. HAEMATOL /2012/082149 entitled “Acute myeloid leukemia with translocation t(3;5): new molecular insights “

Authors: Florent Dumézy, Aline Renneville, Caroline Mayeur-Rousse, Olivier Nibourel, Elise Boudry- Labis, Claude Preudhomme

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:

- Claude Preudhomme, Laboratoire d’Hématologie, CHU de Lille; Université de Lille 2, Lille; IRCL Inserm U837; claud.preudhomme@CHRU-lille.fr

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Claude Preudhomme was responsible of the conception of the study

3) Design & Methods. The following authors were responsible for specific investigations:

- Florent Dumézy, Aline Renneville and Claude Preudhomme were responsible of the design of the study

4) Results. The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table):

- Florent Dumézy was responsible of the cytological analysis and the collection of data (table1)
- Aline Renneville, Caroline Mayeur-Rousse were responsible of the molecular biology results (table1)
- Elise Labis was responsible of cytogenetic results (table1)
- Olivier Nibourel was responsible of the transcriptomic analysis (figure 1)

5) Writing the manuscript. The following authors were responsible for writing the manuscript:

- Claude Preudhomme , Florent Dumézy, Aline Renneville and Caroline Mayeur-Rousse were responsible for writing the manuscript

6) Contributors Listed in Acknowledgments: (Examples of those who might be acknowledged include a person who provided purely technical help, writing assistance, or a department chair who provided only general support. Corresponding authors must declare whether they had assistance with the study design, data collection, data analysis, or manuscript preparation. If such assistance was available, the authors must disclose the identity of the individuals who provided this assistance and the entity that supported it. Financial and material support should also be acknowledged.)
