Title: A reversion of an IL2RG mutation in combined immunodeficiency providing competitive advantage to the majority of CD8+ T cells

First author: T.W. Kuijpers

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship.”

The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Specific contributions of each author are listed on page 2 of this document.

Responsible author(s):

author(s) responsible for the integrity of the work as a whole

Author contributions (maximum 1 page):

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, collection of images, interpretation of data, preparation of the text, etc.)

Taco W. Kuijpers: Interpretation of data, preparation of the text, collection of data, generation of figures.
Ester M.M. van Leeuwen: collection of data, design of experiments, data analysis, generation of figures, interpretation of data, preparation of the text.
Barbara H Barendregt: experiments, data analysis
Paul Klarenbeek: experiments, data analysis
Daan J. aan de Kerk: experiments, data analysis
Paul A. Baars: data analysis, design of experiments, interpretation of data, generation of figures
Machiel H. Jansen: experiments, data analysis
Niek de Vries: interpretation of data
René A. W. van Lier: interpretation of data, preparation of the text
Mirjam van der Burg: data analysis, interpretation of data, preparation of the text, generation of figures
