<b>Title</b>	Common Variable Immunodeficiency and Idiopathic Primary Hypogammaglobulinemia: two different conditions within the same disease spectrum
<b>First author</b>	Gertjan J Driessen

According to the International Committee of Medical Journal Editors (ICMJE)

([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)):

*“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.*

**The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.**

*Specific contributions of each author are listed on page 2 of this document.*

### **Responsible author(s):**

*author(s) responsible for the integrity of the work as a whole*

**Author contributions (maximum 1 page):**

*Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, collection of images, interpretation of data, preparation of the text, etc.)*

The specific authors' contributions are:

GJD, MvdB designed the research

VD, PMvH, NGH, MvR, AR, AW, EdV contributed clinical data and provided material necessary for performing experiments

JJMvD and MvZ provided conceptual advice

BHB, SP, IP performed and interpreted the experiments

HAG and GJD analyzed the data

GJD and MvdB wrote the manuscript

VD, PMH, NGH, AW, EdV, AR, MvZ and JJMvD commented on the manuscript.
