author contribution form

Title	<i>Investigation of the role of interleukin-6 and hepcidin antimicrobial peptide in the development of anemia with age.</i>
First author	<i>Bryan J. McCranor</i>

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Specific contributions of each author are listed on page 2 of this document.

Responsible author(s):

author(s) responsible for the integrity of the work as a whole

Name: Cindy N. Roy
Institute: Johns Hopkins University School of Medicine

Author contributions (maximum 1 page):

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, collection of images, interpretation of data, preparation of the text, etc.)

- 1.) Bryan McCranor performed experiments and data collection, analyzed and interpreted data, wrote and revised the manuscript and approved the final version.
- 2.) Jacqueline Langdon performed experiments and data collection, analyzed and interpreted data, revised the manuscript, and approved the final version.
- 3.) Olivier Prince performed experiments and data collection, analyzed and interpreted data, revised the manuscript and approved the final version.
- 4.) Laurette Femnou performed experiments and data collection, analyzed and interpreted data, revised the manuscript and approved the final version.
- 5.) Alan Berger analyzed and interpreted data, revised the manuscript, and approved the final version.
- 6.) Chris Cheadle supervised the performance of experiments and data collection, analyzed and interpreted data, revised the manuscript, and approved the final version.
- 7.) Curt Civin designed the research, interpreted data, revised the manuscript, and approved the final version.
- 8.) Airie Kim analyzed and interpreted data, revised the manuscript, and approved the final version.
- 9.) Seth Rivera designed the research, performed experiments and data collection, analyzed and interpreted data, revised the manuscript, and approved the final version.
- 10.) Tomas Ganz designed the research, interpreted data, revised the manuscript and approved the final version.
- 11.) Sophie Vaultont designed the research, interpreted data, revised the manuscript, and approved the final version.
- 12.) Qian-Li Xue analyzed and interpreted data, revised the manuscript, and approved the final version.
- 13.) Jeremy Walston designed the research, interpreted data, revised the manuscript, and approved the final version.
- 14.) Cindy Roy designed research, performed experiments and data collection, analyzed and interpreted data, generated figures, wrote and revised the manuscript, and approved the final version.
