Title | Genetic correction of HAX1 in induced pluripotent stem cells from a patient with severe congenital neutropenia improves defective granulopoiesis
---|---
First author | Tatsuya Morishima

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html):
"Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship."

The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Specific contributions of each author are listed on page 2 of this document.

**Responsible author(s):**

author(s) responsible for the integrity of the work as a whole

Author contributions (maximum 1 page):

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, collection of images, interpretation of data, preparation of the text, etc.)

Tatsuya Morishima designed the research, performed experiments, collected, analyzed and interpreted the data, prepared figures, and wrote the manuscript.

Ken-ichiro Watanabe designed the research, analyzed and interpreted the data, and wrote the manuscript.

Akira Niwa, Hideyo Hirai, Satoshi Saida, and Takayuki Tanaka performed experiments, collected, analyzed and interpreted the data.

Katsutsugu Umeda analyzed and interpreted the data and wrote the manuscript.

Itaru Kato, Hidefumi Hiramatsu, Megumu K. Saito, Kousaku Matsubara, Souichi Adachi, Masao Kobayashi, and Tatsutoshi Nakahata analyzed and interpreted the data.

Toshio Heike designed the research, analyzed and interpreted the data, and critically read the manuscript.
