Title: Bone marrow fibrosis in 66 Immune Thrombocytopenia patients treated with thrombopoietin receptor agonists: a single center long-term follow-up

First author: Waleed Ghanima

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html):
“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Specific contributions of each author are listed on page 2 of this document.

Responsible author(s): Waleed Ghanima

Author contributions (maximum 1 page):

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, collection of images, interpretation of data, preparation of the text, etc.)

WG conceived and designed the study, analyzed the data and drafted the manuscript; JTG, LB, AO participated in study conception and design, reassessed the bone marrow biopsies and participated in data extraction and manuscript preparation; CSL participated in patient recruitment, data collection and analysis and drafting of the manuscript; AMI participated in patient recruitment and data collection; JBB participated in the study conception and conduct, patients examinations and manuscript preparation. All coauthors reviewed the manuscript and approved its final version.
