Title	Molecular analysis of Fanconi anemia: the experience of the Bone Marrow Failure Study Group of the Italian Association of Pediatric Onco-Hematology
First author	Daniela De Rocco

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Specific contributions of each author are listed on page 2 of this document.

Responsible author(s):

author(s) responsible for the integrity of the work as a whole

Author contributions (maximum 1 page):

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, collection of images, interpretation of data, preparation of the text, etc.)

DDR, RB, EN, and CG performed mutational screening of the FA genes, RT-PCR, and bioinformatics analysis;

MC, AB, and FDR carried out protein analysis;

EC, SC, and FC established lymphoblast cell lines and primary fibroblast cells, carried out dieoxybutane test and cell cycle analysis;

EC and HH performed complementation analysis;

JS, MP, CM, GC, FV, CC, AL, PF, DL, UR, WB, FT, SP, PG, and CD enrolled patients for the study;

DDR, RB, and AS were responsible for writing the manuscript;

AS, CD, and FDR participated in the study design;

All authors revised and approved the manuscript.
