Title	The outcome of B-cell receptor signaling in CLL: proliferation or anergy
First author	Graham Packham

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author(s) of this manuscript confirm(s) that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Specific contributions of each author are listed on page 2 of this document.

Responsible author(s):

author(s) responsible for the integrity of the work as a whole

Name: Graham Packham

Author contributions (maximum 1 page):

Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, collection of images, interpretation of data, preparation of the text, etc.)

GP (Graham PACKHAM) and FKS (Freda STEVENSON) analyzed the literature on the B-cell receptor and anergy in CLL, and wrote that part of the review.

SK (Serge KRYSOV) analyzed the literature on signalling pathways, contributed to the review and provided recent data. He also prepared Figures.

AA (Alex ALLEN) and NS (Natalia SAVELYEVA) analyzed the literature on B-cell memory and anergy in mouse models, and contributed to that part of the review.

AJS (Andrew STEELE) analyzed the literature on inhibitory drugs in CLL and contributed to that aspect of the review.

FF (Francesco FORCONI) analyzed the literature on the clinical background of CLL and contributed to the part of the review which addressed the relationship to the biology.

All authors approved the manuscript.
