Detection of monoclonal T populations in patients with KIR-restricted chronic lymphoproliferative disorder of NK cells

- Persistent antigenic pressure
- Chronic inflammation
- T cells
- Natural killer cells
- NK lymphoproliferation
- NK clone chronic lymphoproliferative disorder of natural killer cells (CLPD-NK)
- T clone T-large granular lymphocytic leukemia (T-LGLL)
- Switch from CLPD-NK to T-LGLL
- Appearance of a T clone subset
- Maintenance of NK-clone
- NK and T lymphoproliferation
- NK and T clones CLPD-NK/T-LGLL
