AUTHOR CONTRIBUTION FORM

Title	<i>In vivo and in vitro</i> sensitivity of Blastic Plasmacytoid Dendritic Cell Neoplasm to SL-401, an interleukin-3 receptor targeted biologic agent
First author	Fanny ANGELOT-DELETTRE

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html):

“Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2 and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The responsible author of this manuscript confirms that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

Responsible author (<i>author responsible for the integrity of the work as a whole</i>)
Name: Francine GARNACHE -OTTOU
Institute: UMR Inserm1098/EFS Bourgogne Franche comté
e-mail: francine.garnache@efs.sante.fr

Author contributions <i>Please describe the contributions of each author, indicating who was responsible for each part of the study and the preparation of the manuscript (collection of data, experiments, data analysis, generation of figures, interpretation of data, preparation of the text, etc.):</i>
F Angelot Delettre, P Saas, E Rowinsky, C Brooks, and F Garnache Ottou designed the study, and/or analyzed the data, and/or wrote the manuscript; F Angelot Delettre, S Biichle, A Roggy, B Royer and F Garnache Ottou performed and/or validated experiments. F

Angelot Delette, F Garnache Ottou and B Lamarthee performed and/or validated mice experiments. E Seilles, E Deconinck, V Bardet, B Benet, H Bennani, Z Benseddik, A Debliquis, D Lusina, M Roussel, F Solly, M Ticchioni were involved directly in the care of patients and/or sample procurement; F Angelot Delette performed statistical analysis; A E Frankel contribute to improve the manuscript; E K Rowinsky and C Brooks provided essential reagent SL-401.

F Garnache Ottou
