Version 4

Pediatric T-lymphoblastic leukemia evolves into relapse by clonal selection, acquisition of mutations and promoter hypomethylation

Disclosures: This work was funded by: German Consortium for Translational Cancer Research (DKTK), German Ministry of Education and Research (BMBF, NGFN Plus), "Tour der Hoffnung", Manfred Lautenschlaeger Stiftung, European Commission (FP7, ERA-NET on Translational Cancer Research, TRANSCALL to M.U.M.; Health-F2-2010-260791 and an European Research Council grant to J.O.K.). J.E. and J.B.K. received fellowships from the Heidelberg Research Centre for Molecular Medicine. O.R.B. received a Fellowship from the Excellence Initiative Heidelberg, Innovation Fund FRONTIER.

Contributions: J.B.K., O.R.B., J.E., P.P., S.S., A.M.S. and V.B. performed experiments. J.B.K. designed research and experiments and wrote the manuscript. T.R. performed the computational analysis of the sequencing data jointly with J.B.K.. Y.A. analyzed methylation data. J.W. performed logistic regression analysis. R.K.S., J.H., C.E., A.S., M.S., M.S., R.K., S.A., S.E., R.H. contributed patient samples and clinical data. J.O.K., M.U. M. and A.K. designed and oversaw the research and contributed to the writing of the manuscript. All authors read and approved the manuscript.
