Interleukin-6 receptor-alpha signaling drives anti-RBC alloantibody production and T follicular helper cell differentiation in a murine model of red blood cell alloimmunization

Abhinav Arneja, Juan E. Salazar, Wenyu Jiang, Jeanne E. Hendrickson, James C. Zimring, and Chance John Luckey

Disclosures: J.C.Z. has a sponsored research agreement with Immucor Inc and is on the scientific advisory board of Rubius Therapeutics, and both of these are unrelated to the topic of the current manuscript. The other authors have no conflict of interests.

Contributions: A.A., J.E.S. and W.J. performed the experiments. A.A. and C.J.L. designed the experiments, analyzed and interpreted the data, and wrote the manuscript. J.C.Z. and J.E.H. provided mice and reagents, helpful discussions, and critically reviewed the manuscript.
