CDCA7 is a critical mediator of lymphomagenesis that selectively regulates anchorage-independent growth

Raúl Jiménez-P., Carla Martín-Cortázar, Omar Kourani, Yuri Chiodo, Raul Cordoba, María Purificación Domínguez-Franjo, Juan Miguel Redondo, Teresa Iglesias, and Miguel R. Campanero

Disclosures: None

Contributions: MRC conceived and designed the study. RJ-P performed most of the experiments with contributions from CM-C, OK, and YC. RC and MPD-F reviewed lymphoma cases, provided human tissue samples and performed research with these samples. JMR and TI provided experimental support and ideas for the project. RJ-P and MRC analyzed the data with contributions from all other authors. MRC wrote the manuscript with contributions from JMR and TI. All authors approved the manuscript.
