Version 3

Tracking of myeloid malignancies by targeted analysis of successive  
DNA methylation at neighboring CG dinucleotides

Monika Eipel, Tanja Boi, Anna Mies, Fabian Beier, Edgar Jost, Tim H.  
Brümmendorf, Uwe Platzbecker, and Wolfgang Wagner

Disclosures: This work was funded by the Interdisciplinary Center for Clinical Research within the faculty of Medicine at the RWTH Aachen University (O1-3); by the Else Kröner-Fresenius-Stiftung (2014\_A193); by the Deutsche Forschungsgemeinschaft (DFG; WA 1706/8-1 and WA1706/11 1), and by Deutsche Krebshilfe (TRACK-AML). W.W. is co-founders of Cygenia GmbH ([www.cygenia.com](http://www.cygenia.com)) that may provide service for the epigenetic signatures described in this study and M.E. contributes to this company, too. Apart from this, the authors have nothing to disclose.

Contributions: ME has performed experiments and wrote the manuscript; TB and AM have performed Experiments; FB, THB, EJ, UP have provided samples and helped designing the study; WW has written the manuscript and supervised the study
