HAEMATOL/2019/225862
Version 1

The stromal microenvironment provides an escape route from FLT3
inhibitors through the GAS6-AXL-STAT5 axis

Anna Orlova, Heidi A. Neubauer, and Richard Moriggl

Disclosures: HAN and RM are supported by the Austrian Science Fund (FWF) [SFB-F04707, SFB-F06105, and under the frame of ERA PerMed (I 4218-B) and ERA-NET (I 4157-B)]. RM, HAN and AO were also generously supported by a private donation from Liechtenstein.

Contributions: AO, HAN and RM wrote the manuscript, performed OncoPrint analysis and designed the figure. The graphical visualization of the figure was done by somersault18:24.
