

Haematologica  
HAEMATOL/2018/203380  
Version 3

The myeloid differentiation factor 88 signaling in donor T cells  
accelerates graft-versus-host disease

Satomi Matsuoka, Daigo Hashimoto, Masanori Kadowaki, Hiroyuki Ohigashi, Eiko Hayase, Emi Yokoyama, Yuta Hasegawa, Takahiro Tateno, Xuanzhong Chen, Kazutoshi Aoyama, Hideyo Oka, Masahiro Onozawa, Kiyoshi Takeda, Koichi Akashi, and Takanori Teshima

Disclosures: 1. This study was supported by JSPS KAKENHI (21390295 and 17H04206 to T.T., 17K09945 to D.H.), Japan Society of Hematology Research Fund (T.T.), the Center of Innovation Program from JST (T.T.), and research grants from the Mochida Memorial Foundation for Medical and Pharmaceutical Research (D.H.). 2. The authors declare no competing financial interests. 3. No patent.

Contributions: T.T. and D.H. developed the conceptual framework of the study, designed the experiments, conducted studies, analyzed data and wrote the paper. S.M. and M.K. designed the experiments, conducted studies, analyzed data and wrote the paper. H.Ohigashi, E.H., E.Y., T.Tateno., Y.H., X.C., K.A., and H.Oka conducted studies and analyzed data. M.O., K.T., and K.A. supervised experiments.
