Differential effects of BTK inhibitors ibrutinib and zanubrutinib on NK
cell effector function in patients with mantle cell lymphoma

Thijs W.H. Flinsenbergh, Charnelle C. Tromedjo, Nan Hu, Ye Liu, Yin Guo, Kevin Y.T. Thia, Tahereh Noori, Xiaomin Song, Han X. Aw Yeang, Daniela G. Tantalò, Sasanka Handunnetti, John F. Seymour, Andrew W. Roberts, David Ritchie, Rachel Koldej, Paul J. Neeson, Lai Wang, Joseph A. Trapani, Constantine S. Tam, and Ilia Voskoboinik

Disclosures: CT receive honorarium and research funding from BeiGene. NH, YL, YG, XS and LW are employed by BeiGene.

Contributions: TF, CCT, KT, TN, NH, YL and YG performed experiments and analyzed data. DT and HXAY performed high dimensional analysis of the FACS-data. NH, LW, YL, YG and XS performed pre-clinical experiments on ibrutinib and zanubrutinib. PN and JT provided important intellectual input. IV and CT supervised the study and analysed data. SH, JS, AR, DR and RK included patients and/or processed and stored patient samples. TF, CT and IV co-wrote the manuscript; and all the authors contributed to its editing.
