Erythrocytapheresis as a novel treatment option for adult patients with  
pyruvate kinase deficiency

Rawia F.G. Jensen, Morten H. Dziegiel, Klaus Rieneck, Henrik Birgens,  
and Andreas Glenthøj

Disclosures: AG: Steering committee member of the Agios sponsored PEAK registry – A Global Longitudinal Study of PK Deficiency. Consultancy for Agios as a member of the Agios sponsored “Burden of Disease Working Group” for PKD. The remaining authors declare no conflict of interest.

Contributions: RJ and AG reviewed data and made figures. AG, MD, KR, HB were responsible for treatment. All authors contributed to the writing of the manuscript.
