Version 3

Clonal haematopoietic mutations linked to platelet traits and the risk of
thrombosis or bleeding

Alicia Veninga, Ilaria de Simone, Johan W.M. Heemskerk, Hugo ten
Cate, and Paola E.J. van der Meijden

Disclosures: Hugo ten Cate is shareholder of Coagulation Profile, a university spin off diagnostic company. He is a consultant to Alveron and has received research support from Bayer and Pfizer. None of the other authors declare any relevant COI.

Contributions: AV, IDS and PEJM were the lead authors of the manuscript, the design of which was equally contributed to by all authors. JWMH and HtC provided critical revisions.
