**Figure S1. Subgroup analysis for Ph-negative HR-ALL**

**Figure S1:** Survival outcomes. (A) Overall survival (OS) and Event-free survival (EFS) for entire cohort (Ph-negative) according to allo-HSCT versus chemotherapy by left-truncated Kaplan-Meier method. (B) OS and EFS for Ph-negative patients who had negative minimal residual disease (MRD) at day 45 (post-induction) according to allo-HSCT versus chemotherapy by left-truncated Kaplan-Meier method. (C) OS and EFS for Ph-negative patients who had positive MRD at day 45 according to allo-HSCT versus chemotherapy by left-truncated Kaplan-Meier method.
