Evolutionary crossroads: morphological heterogeneity reflects divergent
intra-clonal evolution in a case of high-grade B-cell lymphoma

Valentina Tabanelli, Federica Melle, Giovanna Motta, Saveria Mazzara,
Marco Fabbri, Chiara Corsini, Elvira Gerbino, Angelica Calleri, Maria
Rosaria Sapienza, Ignazio Abbene, Viviana Stufano, Massimo
Barberis, and Stefano A. Pileri

Disclosures: SAP received honoraria for educational activities from Celgene. The
remaining authors have no financial relationship to disclose.

Contributions: VT, FM, GM and SM performed research and data analysis, and wrote the
manuscript; SM and MF performed data analysis; CC, GE, AC, VS and MB performed
research and data analysis; IA collected samples and clinical data; SAP and MRS
supervised the study.
