

Manuscript no. HAEMATOL 2009/015917 entitled "The quality of response to lenalidomide plus dexamethasone is associated with improved clinical outcomes in patients with relapsed or refractory multiple myeloma"

Authors: HAROUSSEAU Jean-Luc , MD

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:

- Jean-Luc Harousseau, Centre René Gauducheau, Bd Jacques Monod France, jl-harousseau@nantes.fnclcc.fr

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): "Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship".

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the **conception of the study**:

Jean-Luc Harousseau, Centre René Gauducheau, Bd Jacques Monod France, jl-harousseau@nantes.fnclcc.fr

Meletios A Dimopoulos, Department of Clinic Therapeutics, University of Athens School of Medicine, Athens, Greece, mdimop@med.uoa.gr

Michael Wang, MD Anderson Cancer Center, Houston, Texas, USA, miwang@mdanderson.org

Alessandro Corso, Division of Hematology, Fondazione IRCCS Policlinico S. Matteo, University of Pavia, Italy, a.corso@smatteo.pv.it

Christine Chen, Princess Margaret Hospital, Toronto, Ontario, Canada, christine.chen@uhn.on.ca

Michel Attal, Division of Hematology, Centre Hospitalier Université de Purpan, Toulouse, France, attal.m@chu-toulouse.fr

Andrew Spencer, Alfred Hospital, Melbourne, Australia, aspencer@netspace.net.au

Zhinuan Yu, Celgene Corporation, Summit, NJ, USA, zyu@celgene.com

Marta Olesnyckyj, Celgene Corporation, Summit, NJ, USA, molesnyckyj@celgene.com

Jerome B. Zeldis, Celgene Corporation, Summit, NJ, USA, jzeldis@celgene.com

Robert D. Knight, Celgene Corporation, Summit, NJ, USA, rknight@celgene.com

Donna M. Weber, Celgene Corporation, Summit, NJ, USA, dmweber@mdanderson.org

3) **Design & Methods.** The following authors were responsible for specific investigations (please detail):

- Jean-Luc Harousseau was/were responsible for selection, treatment and assessment of patients
- Meletios A Dimopoulos was/were responsible for selection, treatment and assessment of patients
- Michael Wang was/were responsible for selection, treatment and assessment of patients
- Alessandro Corso was/were responsible for selection, treatment and assessment of patients

- Christine Chen was/were responsible for selection, treatment and assessment of patients
- Michel Attal was/were responsible for selection, treatment and assessment of patients
- Andrew Spencer was/were responsible for selection, treatment and assessment of patients
- Zhinuan Yu was/were responsible for statistical analysis
- Marta Olesnyckyj was/were responsible for selection, treatment and assessment of patients
- Jerome B. Zeldis was/were responsible for assessment of patients
- Robert D. Knight was/were responsible for assessment of patients
- Donna M. Weber was/were responsible for selection, treatment and assessment of patients

4) **Results.** The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table):

- Jean-Luc Harousseau was/were responsible for analysis of results
- Meletios A Dimopoulos was/were responsible for analysis of results
- Michael Wang was/were responsible for analysis of results
- Alessandro Corso was/were responsible for analysis of results
- Christine Chen was/were responsible for analysis of results
- Michel Attal was/were responsible for analysis of results
- Andrew Spencer was/were responsible for analysis of results
- Zhinuan Yu was/were responsible for statistical analysis
- Marta Olesnyckyj was/were responsible for analysis of results
- Jerome B. Zeldis was/were responsible for analysis of results
- Robert D. Knight was/were responsible for analysis of results
- Donna M. Weber was/were responsible for analysis of results

5) **Writing the manuscript.** The following authors were responsible for writing the manuscript:

- Jean-Luc Harousseau was/were responsible for concept, development and writing
- Meletios A Dimopoulos was/were responsible for concept, development
- Michael Wang was/were responsible for concept, development
- Alessandro Corso was/were responsible for concept, development
- Christine Chen was/were responsible for concept, development
- Michel Attal was/were responsible for concept, development
- Andrew Spencer was/were responsible for concept, development
- Zhinuan Yu was/were responsible for concept, development, statistics
- Marta Olesnyckyj was/were responsible for concept, development
- Jerome B. Zeldis was/were responsible for concept, development
- Robert D. Knight was/were responsible for concept, development
- Donna M. Weber was/were responsible for concept, development

6) **Contributors Listed in Acknowledgments:**

The authors received editorial support in the preparation of this manuscript from Excerpta Medica, funded by Celgene Corporation.
