

Manuscript no. HAEMATOL.2010.026260 entitled "Predictive role of 9-O-acetylated ganglioside D3 (CD60) and $\alpha 4\beta 1$ (CD49d) expression in the survival of patients with Sézary Syndrome"

Authors: Enrico Scala, Damiano Abeni, Debora Pomponi, Maria Grazia Narducci, Giuseppe Alfonso Lombardo, Adriano Mari, Marina Frontani, Maria Cristina Picchio, Maria Antonietta Pilla, Elisabetta Caprini and Giandomenico Russo

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:

- Enrico Scala, Center for Molecular Allergology, Istituto Dermatologico dell'Immacolata (IDI-IRCCS), Rome, Italy, e.scala@idi.it
- Giandomenico Russo, Laboratory of Molecular Oncology, Istituto Dermatologico dell'Immacolata (IDI-IRCCS), Rome, Italy, russo@idi.it

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html): "Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship".

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Enrico Scala and Giandomenico Russo.

3) Design & Methods. The following authors were responsible for specific investigations:

- Giuseppe Alfonso Lombardo, Marina Frontani, and Maria Antonietta Pilla enrolled and clinically evaluated and visit the patients
- Enrico Scala, Debora Pomponi, Maria Grazia Narducci, Maria Cristina Picchio, and Elisabetta Caprini performed the laboratory work for this study
- Damiano Abeni, Maria Antonietta Pilla and Adriano Mari participated in the statistical analysis

4) Results. The following authors were responsible for specific portions of the results, including figures and tables:

- Debora Pomponi, Maria Grazia Narducci, Maria Cristina Picchio and Enrico Scala were responsible for the specific portions of the results entitled "Surface analysis of CD4, CD7, CD8, CD26, CD49d and CD60 (Table 1)" and "Analysis of TCR-V β families in circulating SS cells".
- Enrico Scala, Elisabetta Caprini, Adriano Mari and Damiano Abeni were responsible for the specific portions of the results entitled "CD60 and CD49d as independent markers of prognostic outcome in SS (Figure 1-3 and Table 2-3)"

5) Writing the manuscript. The following authors were responsible for writing the manuscript:

- Enrico Scala, Adriano Mari and Giandomenico Russo wrote the paper

6) Contributors Listed in Acknowledgments:

R. Simoni and B. Didona provided general support, C. Barbieri (data collection), R. Benucci (data collection), A. Monopoli (data collection), M. Marrazza, M. Perez (data analysis), G. Alvetreti (nurse care). The study was supported by the Italian Ministry of Health, Programma Ricerca Corrente 2006-2008.
