

Manuscript no. HAEMATOLHAEMATOL/2010/027441 entitled "Highly active antiretroviral therapy alone may be an effective treatment for HIV-associated multicentric Castleman disease"

Authors: Lee SM, Edwards SG, Chilton DN, Ramsay A, Miller RF

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:
• Professor Siow-Ming Lee, Dept of Oncology, UCLH and UCL Cancer Institute, London.
Sm.lee@uclh.nhs.uk

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): "Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship".

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Lee SM, Edwards SG

3) Design & Methods. The following authors were responsible for specific investigations
• Lee SM, Edwards SG, Chilton DN, Ramsay A, Miller RF were responsible for design and methods including organizing relevant tests and supervising treatments.

4) Results. The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table):

- Lee SM, Edwards SG, Chilton DN and Miller RF were responsible for results, including tables and analyzing data
- Ramsay A was responsible for results, including figures and reporting histology results

5) Writing the manuscript. The following authors were responsible for writing the manuscript:

- Lee SM wrote 1st draft and Edwards SG, Chilton DN, Ramsay A, Miller RF jointly wrote the MS.

6) Contributors Listed in Acknowledgments:

See above

(Examples of those who might be acknowledged include a person who provided purely technical help, writing assistance, or a department chair who provided only general support. Corresponding authors must declare whether they had assistance with the study design, data collection, data analysis, or manuscript preparation. If such assistance was available, the authors must disclose the identity of the individuals who provided this assistance and the entity that supported it. Financial and material support should also be acknowledged.)
