

Manuscript no. HAEMATOL HAEMATOL/2010/030288 entitled "Persistence of recipient-type endothelium after allogeneic hematopoietic stem cell transplantation"

Authors: Regula J. Mueller, Georg Stussi, Gisella Puga Yung, Milica Nikolic, Davide Soldini, Jörg Halter, Sandrine Meyer-Monard, Alois Gratwohl, Jakob R. Passweg, Bernhard Odermatt, Urs Schanz, Barbara C. Biedermann, and Jörg D. Seebach

Information about the contributions of each person named as having participated in the study

1) **Guarantor(s)**, i.e., person(s) who is (are) responsible for the integrity of the work as a whole:
• Jörg D. Seebach, Division of Immunology and Allergology, University Hospital and Medical Faculty Geneva, joerg.seebach@hcuge.ch

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): "Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3. Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship".

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the **conception of the study**: Jörg D. Seebach, Georg Stussi and Regula J. Mueller

3) **Design & Methods**. The following authors were responsible for specific investigations:
• Regula J. Mueller performed ABO immunohistochemistry, conducted STR analysis and analyzed the data
• Milica Nikolic helped with the laser-capture microdissection of the skin biopsies
• Davide Soldini conducted fluorescence *in-situ* hybridization
• Sandrine Meyer-Monard gave advice to the molecular analysis
• Alois Gratwohl, Jakob R. Passweg, Georg Stussi, Jörg Halter and Urs Schanz were responsible for the patient management and clinical care
• Bernhard Odermatt contributed to the study planning and was responsible for analysis of the autopsy samples
• Urs Schanz and Barbara C. Biedermann provided the skin biopsy samples and contributed to the study design

4) **Results**. The following authors were responsible for specific portions of the results, including figures and tables:
• Regula J. Mueller, Georg Stussi, Milica Nikolic and Sandrine Meyer-Monard were responsible for STR analysis and Figure 1
• Regula J. Mueller, Urs Schanz and Barbara C. Biedermann were responsible for skin biopsies, ABH staining and Figure 2
• Regula J. Mueller and Davide Soldini were responsible for tumor samples, immunohistochemistry/FISH analysis and Figure 3
• Regula J. Mueller and Bernhard Odermatt were responsible for autopsy samples, ABH staining and Figure S1

- Regula J. Mueller, Gisella Puga Yung, Jörg D. Seebach and Georg Stussi were responsible for Table 1
- Gisella Puga Yung and Jörg D. Seebach were responsible for supplementary Table S1

5) **Writing the manuscript.** The following authors were responsible for writing the manuscript:

- Regula J. Mueller, Georg Stussi and Jörg D. Seebach were responsible for Introduction section
- Regula J. Mueller, Georg Stussi, Davide Soldini, Milica Nikolic and Jörg D. Seebach were responsible for Design and Method section
- Regula J. Mueller, Georg Stussi and Jörg D. Seebach were responsible for Results section
- Regula J. Mueller, Georg Stussi, Alois Gratwohl, Barbara C. Biedermann and Jörg D. Seebach were responsible for Discussion section
- Regula J. Mueller, Gisella Puga Yung were responsible for On-line supplementary Material section
- Georg Stussi, Gisella Puga Yung and Jörg D. Seebach were responsible for results and discussion revision and modifications

6) **Contributors Listed in Acknowledgments:**

- Andreas Zisch and Solange Moll for the critical reading of the manuscript
 - Katja Huggel for microscopical reevaluation
 - Claudia Ledermann and team of Molecular Diagnostics, University Hospital Basel, for their help with the STR analysis
 - Silvia Behnke and team for expert advice for immunohistochemical issues
 - Astrid Morger for excellent technical assistance
 - Jens Kelm for his help with microscopical analyses.
- Supported by the Swiss National Foundation (NFP46), by the Research Commission and Young Investigator Promotion of the University Zürich, by the Krebsliga of the Canton of Zürich, Switzerland and by UBS AG on behalf of a client, as well as the contributions of the Hans Wilsdorf Foundation and the late Christian Loepfe in support of transplantation research, Switzerland.
