

Manuscript n° HAEMATOL/2010/029082 entitled: " Glucose availability in hypoxia regulates the selection of chronic myeloid leukemia progenitor subsets with different resistance to Imatinib-mesylate"

Authors: Serena Giuntoli, Michele Tanturli, Federico Di Gesualdo, Valentina Barbetti, Elisabetta Rovida, Persio Dello Sbarba.

Information about the contributions of each person named as having participated in the study

1) Guarantor(s) (person(s) who is (are) responsible for the integrity of the work as a whole):
• Persio Dello Sbarba; E-mail: persio@unifi.it

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): "Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship".

The guarantor of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Serena Giuntoli and Persio Dello Sbarba.

3) Design & Methods. The following authors were responsible for specific investigations:
• Serena Giuntoli was responsible for stem cell (CRA) assays
• Serena Giuntoli and Federico Di Gesualdo were responsible for measures of glucose concentration in culture media
• Michele Tanturli and Federico Di Gesualdo were responsible for western blotting
• Valentina Barbetti and Elisabetta Rovida were responsible for flow cytometry

4) Results. The following authors were responsible for specific portions of the results, including figures and tables:

- Serena Giuntoli, Valentina Barbetti and Elisabetta Rovida were responsible for Figure 1
- Serena Giuntoli and Federico Di Gesualdo were responsible for Figures 2, 3
- Serena Giuntoli was responsible for Figures 4, 5, 6
- Serena Giuntoli and Michele Tanturli were responsible for Figure 7
- Persio Dello Sbarba was responsible for Table 1.

5) Writing the manuscript. The following authors were responsible for writing the manuscript:
• Serena Giuntoli, Persio Dello Sbarba.

6) Contributors listed in Acknowledgments: There was no assistance with respect to study design, data collection and analysis, or manuscript preparation, writing and editing provided by any person except the authors themselves. Purely technical help was from Dr. S. Mercurio, Clinical Biochemistry Laboratory, Azienda Ospedaliera-Universitaria di Careggi, Firenze, Italia, E.U., for the measure of glucose concentration in culture media. This contribution, as well as sources of financial support, are acknowledged in the manuscript.
