

Manuscript no. HAEMATOL 2010/033456 entitled “A high-risk signature for patients with multiple myeloma established from human myeloma cell lines molecular classification“

Authors: Jérôme Moreaux, Bernard Klein, Régis Bataille, Géraldine Descamps, Sophie Maïga, Dirk Hose, Hartmut Goldschmidt, Anna Jauch, Thierry Rème, Michel Jourdan, Martine Amiot, Catherine Pellat-Deceunynck

Information about the contributions of each person named as having participated in the study

- 1) Guarantor(s)**, i.e., person(s) who is (are) responsible for the integrity of the work as a whole:
- Catherine Pellat-Deceunynck, Inserm UMR_S892, Catherine.Pellat-Deceunynck@inserm.fr
 - Bernard Klein, Inserm U847, bernard.klein@inserm.fr

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “*Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship*”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Catherine Pellat-Deceunynck, Régis Bataille, Martine Amiot, Bernard Klein

3) Design & Methods. The following authors were responsible for specific investigations (please detail):

- Jérôme Moreaux and Catherine Pellat-Deceunynck were responsible for gene expression profile analysis and performed research
- Géraldine Descamps, Sophie Maïga and Michel Jourdan were responsible for identification of each myeloma cell line (phenotype, HLA typing, cytogenetic analyses) and preparation of RNA samples
- Anna Jauch provided cytogenetic analyses
- Dirk Hose and Hartmut Goldschmidt collected bone marrow samples and clinical data
- Thierry Rème participated in the bioinformatic studies

4) Results. The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table):

- Jérôme Moreaux was responsible for Figures 2-4, Tables S1, S4-S12, Figures S1-S7
- Catherine Pellat-Deceunynck was responsible for Figures 1,4, Tables 1, S1, S2, S3,S5-S10, Figure S1

5) Writing the manuscript. The following authors were responsible for writing the manuscript:

- Catherine Pellat-Deceunynck, Jérôme Moreaux, Bernard Klein

6) Contributors Listed in Acknowledgments:

This work was supported by grants from INCa (PL06_070), Ligue Contre le Cancer (Equipes labellisées 2008 and 2009).

We thank the Plate-Forme de Séquençage-Génotypage OUEST Génopole ® for performing cDNA sequencing. Microarrays experiments were done by the Microarray Core Facility of the Institute of Research in Biotherapy, CHRU-INSERM-UM1 Montpellier, <http://irb.chu-montpellier.fr/>.

(Examples of those who might be acknowledged include a person who provided purely technical help, writing assistance, or a department chair who provided only general support. Corresponding authors must declare whether they had assistance with the study design, data collection, data analysis, or manuscript preparation. If such assistance was available, the authors must disclose the identity of the individuals who provided this assistance and the entity that supported it. Financial and material support should also be acknowledged.)
