

Manuscript no. HAEMATOL /2010/035162 entitled “Vitamin K1 supplementation to improve stability of anticoagulation therapy with vitamin K antagonists: a dose-finding study“

Authors: Edward P.A. Gebuis, Frits R. Rosendaal, Erik van Meegen, and Felix J.M. Van Der Meer

Information about the contributions of each person named as having participated in the study

- 1) Guarantor(s)**, i.e., person(s) who is (are) responsible for the integrity of the work as a whole:
- Edward P.A. Gebuis, Department of Thrombosis & Hemostasis, Leiden University Medical Center, e.p.a.gebuis@lumc.nl.
 - Frits R. Rosendaal, Departments of Clinical Epidemiology and Thrombosis & Hemostasis, Leiden University Medical Center, f.r.rosendaal@lumc.nl.
 - Felix J.M. van der Meer, Department of Thrombosis & Hemostasis, Leiden university Medical Center, f.j.m.van_der_meer@lumc.nl.

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “*Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship*”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Edward P.A. Gebuis, Frits R. Rosendaal and Felix J.M. van der Meer, Leiden University Medical Center.

3) Design & Methods. The following authors were responsible for specific investigations (please detail):

- Edward P.A. Gebuis, Felix J.M. van der Meer and Frits R. Rosendaal were responsible for the design of the study
- Edward P.A. Gebuis and Erik van Meegen were responsible for patient inclusion, acquisition of data and analysis of data.

4) Results. The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table):

- Edward P.A. Gebuis was responsible for all tables and figures.
- Felix J.M. van der Meer, Frits R. Rosendaal and Edward P.A. Gebuis were responsible and contributed equally to the interpretation of the data leading to the conclusions reached.

5) Writing the manuscript. The following authors were responsible for writing the manuscript:

- Edward P.A. Gebuis and Felix J.M. van der Meer were primarily responsible for writing of the manuscript.
- Frits R. Rosendaal and Erik van Meegen were responsible for making major and minor adjustments to the manuscript.

6) Contributors Listed in Acknowledgments:

Désirée Verbeek-Janssen, head nurse Leiden Anticoagulation clinic.

Marie Annet Zeegers, student assistant.

Caroline Klopper, executive manager anticoagulation clinic Medial.

Marja Sukel, dosing physician anticoagulation clinic Medial.
Manon Goddijn, data manager Leiden University Medical Center.
All nurses and employees of both the Leiden anticoagulation clinic and the anticoagulation clinic Medial.
The study was funded by the Netherlands Heart Foundation (number 2007B211).
