

Manuscript no. HAEMATOL 2010/036343 entitled “T lymphoid differentiation potential measured in vitro is higher in CD34+CD38-/lo hematopoietic stem cells from umbilical cord blood than from bone marrow and is cell intrinsic“

Authors: Magda De Smedt, Georges Leclercq, Bart Vandekerckhove, Tessa Kerre, Tom Taghon, Jean Plum

Information about the contributions of each person named as having participated in the study

- 1) Guarantor(s)**, i.e., person(s) who is (are) responsible for the integrity of the work as a whole:
- Jean Plum, Ghent University, University Hospital Ghent, Belgium, jean.plum@ugent.be
 - Magda De Smedt, Ghent University, University Hospital Ghent, Belgium, magda.desmedt@ugent.be

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “*Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship*”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the **conception of the study**: Magda De Smedt, Jean Plum

3) **Design & Methods**. The following authors were responsible for specific investigations (please detail):

- Magda De Smedt designed the study, performed the experiments, analyzed the data
- Jean Plum designed the study, supervised the experiments, analyzed the data and performed statistical analysis
- Georges Leclercq, Tom Taghon, Tessa Kerre and Bart Vandekerckhove discussed the interpretation and the presentation of the data and contributed to the writing of the manuscript

4) **Results**. The following authors were responsible for specific portions of the results, including figures and tables

5) **Writing the manuscript**. The following authors were responsible for writing the manuscript:

- Magda De Smedt, Jean Plum, Tom Taghon and Georges Leclercq were responsible for writing the manuscript

6) **Contributors Listed in Acknowledgments**:

Juan Carlos Zuniga-Pflücker (University of Toronto, Toronto, ON, Canada) for the OP9-DL1 cells
This work was supported by the Odysseus program of the Fund for Scientific Research Flanders (FWO) and grants from the FWO, the Flemish institute for the Advancement of Scientific-Technological Research in the Industry (IWT), and the Concerted Research Action of Ghent University (GOA). Tessa Kerre is a senior clinical investigator of the FWO. Tom Taghon is a postdoctoral researcher of the FWO.
