

Manuscript no. HAEMATOL/2010/038620 entitled “NPM1 gene deletions in myelodysplastic syndromes with 5q- and complex karyotype”

Authors: Ammatuna E, Panetta P, Agirre X, Ottone T, Lavorgna S, Calasanz MJ and Lo-Coco F.

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:
• Francesco Lo-Coco, Department of Biopathology, University of Tor Vergata and Laboratorio di Neuro-Oncoematologia, Fondazione Santa Lucia, Italy, francesco.lo.coco@uniroma2.it

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “*Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship*”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Francesco Lo-Coco and Emanuele Ammatuna

3) Design & Methods. The following authors were responsible for specific investigations:
• Francesco Lo-Coco and Emanuele Ammatuna were responsible for designing of the study.
• Paola Panetta has performed cytogenetic analysis.
• Xabier Agirreand and Maria José Calasanz have assisted and supervised cytogenetic and methylation studies.
• Tiziana Ottone and Serena Lavorgna have performed *NPM1* mutation and data analysis.
• Francesco Lo-Coco was responsible in conception and design of the study and supervision of the whole work.

4) Results. The following authors were responsible for specific portions of the results, including figures and tables:
• Francesco Lo-Coco and Emanuele Ammatuna were responsible for acquisition of data, compilation of the results and overall interpretation.
• Paola Panetta was responsible for analyzing the cytogenetic results and prepared figure 1 and table 1 for the paper.
• Xabier Agirreand and Maria José Calasanz were responsible for performing and analyzing the cytogenetic and methylation results.
• Maria José Calasanz was responsible for preparing the table 2 for the paper.
• Tiziana Ottone and Serena Lavorgna were responsible for performing and analyzing *NPM1* mutation and data results.

5) Writing the manuscript. The following authors were responsible for writing the manuscript:
• Emanuele Ammatuna, Paola Panetta, Xabier Agirre, Tiziana Ottone, Serena Lavorgna, Maria José Calasanz and Francesco Lo-Coco contributed to manuscript writing.

6) Contributors Listed in Acknowledgments:

The skilled FISH technical assistance of Aroa Irigoyen and Estela Fernández from the Department of Genetics of the University of Navarra, Pamplona, Spain is gratefully acknowledged. We are also grateful to Paola Curzi and Valentina Summa for their generous help in FISH experiments and to Nélica I. Noguera for critical reading of the manuscript.
