

Manuscript no. HAEMATOL/2010/039131 entitled “Leukemia-free survival as a surrogate endpoint for overall survival in the evaluation of maintenance therapy for patients with acute myeloid leukemia in complete remission“

Authors: Buyse M, Michiels S, Squifflet P, Lucchesi KJ, Hellstrand K, Brune ML, Castaigne S, and Rowe JM.

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:

• Marc Buyse, ScD, IDDI (International Drug Development Institute), 30, Avenue Provinciale, 1340 Louvain-la-Neuve, Belgium. Telephone: 32 10 614444. Fax: 32 10 618888. E-mail: marc.buyse@iddi.com

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html): “*Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3* Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Marc Buyse, Stefan Michiels, Pierre Squifflet

3) Design & Methods. The following authors were responsible for specific investigations

• Marc Buyse, Pierre Squifflet, and Stefan Michiels were responsible for analytical methods.
• Kristoffer Hellstrand, Mats L. Brune, Sylvie Castaigne, and Jacob M Rowe were responsible for designing, conducting, and enrolling patients and collecting data for the Phase III trial that is the subject of this work.

4) Results. The following authors were responsible for specific portions of the results, including figures and tables:

• Marc Buyse and Pierre Squifflet were responsible for all results. Stefan Michiels was responsible for the cross-validation analysis.
• Marc Buyse and Kathryn Lucchesi were responsible for Figure 1.
• Marc Buyse and Pierre Squifflet were responsible for Figures 2 and 3 and Table 1.
• Stefan Michiels was responsible for Figure 4.

5) Writing the manuscript. The following authors were responsible for writing the manuscript:

• Marc Buyse, Stefan Michiels, and Kathryn Lucchesi were responsible for writing the manuscript. All authors reviewed and approved the manuscript.

6) Contributors Listed in Acknowledgments:

Dr S. George and two anonymous referees were acknowledged for their useful comments, and Donald Fallon, of MedVal Scientific Information Services, LLC was acknowledged for editorial assistance. Funding to support these analyses and preparation of this paper was provided by EpiCept Corporation. EpiCept Corporation did not contribute to any of the analyses presented, nor to their interpretation.
