

Manuscript no. HAEMATOL/2011/041483 entitled “Stability of human rapamycin-expanded CD4+CD25+ T regulatory cells”

Authors: Eleonora Tresoldi, Ilaria Dell’Albani, Angela Stabilini, Tatiana Jofra, Andrea Valle, Nicola Gagliani, Attilio Bondanza, Maria Grazia Roncarolo, and Manuela Battaglia.

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:

- Manuela Battaglia, San Raffaele Diabetes Research Institute, Via Olgettina 58 20132 Milano ITALY. battaglia.manuela@hsr.it

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study:

- Manuela Battaglia was responsible for the conception of the study.
- Maria Grazia Roncarolo helped in the conception of the study.

3) Design & Methods. The following authors were responsible for specific investigations (please detail):

- Eleonora Tresoldi helped in designing the study, processed the samples and performed the in vitro experiments.
- Ilaria Dell’Albani and Angela Stabilini assisted with sample processing and with the in vitro experiments.
- Andrea Valle and Nicola Gagliani helped in designing the study
- Tatiana Jofra performed the in vivo experiments.
- Attilio Bondanza assisted with the in vivo experiments.
- Manuela Battaglia designed the study.

4) Results. The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table):

- Eleonora Tresoldi was responsible for Figure 1-2-3-4-5-6, Supplementary Figure S1 and Supplementary Table S1.
- Ilaria Dell’Albani, and Angela Stabilini helped for Figure 1-2-3 and Supplementary Figure S1.

- Tatiana Jofra was responsible for Figure 6.

5) **Writing the manuscript.** The following authors were responsible for writing the manuscript:

- Manuela Battaglia was responsible for writing the paper.

6) *Contributors Listed in Acknowledgments:*

The Authors would like to thank all Manuela Battaglia's and Maria-Grazia Roncarolo's laboratory (San Raffaele Scientific Institute, Milano, Italy) for helpful and continuous discussion. We also thank Prof. T Tanaka (Osaka University, Osaka, Japan) for kindly providing the Tmb-1 hybridoma.

All authors declare no potential conflict of interests, except Manuela Battaglia and Maria-Grazia Roncarolo who are the inventors of the patent "*In vitro* generation/expansion of CD4⁺CD25⁺ T regulatory cells by rapamycin." WO 2006/090291A2
