

**Manuscript no. HAEMATOL/2011/047852 entitled “Elevated liver iron concentration is a marker of increased morbidity in patients with B thalassemia intermedia”**

**Authors: Khaled M. Musallam, Maria Domenica Cappellini, John C. Wood, Irene Motta, Giovanna Graziadei, Hani Tamim, and Ali T. Taher**

**Information about the contributions of each person named as having participated in the study**

- 1) Guarantor(s)**, i.e., person(s) who is (are) responsible for the integrity of the work as a whole:
- Khaled M. Musallam, American University of Beirut Medical Center, Beirut, Lebanon, email address: kmm06@aub.edu.lb
  - Ali T. Taher, American University of Beirut Medical Center, Beirut, Lebanon, email address: ataher@aub.edu.lb

According to the International Committee of Medical Journal Editors (ICMJE) ([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)): “*Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 ..... Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship*”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the **conception of the study**: Khaled M. Musallam, Maria Domenica Cappellini, John C. Wood, and Ali T. Taher

3) **Design & Methods**. The following authors were responsible for specific investigations (please detail):

- Irene Motta and Giovanna Graziadei were responsible for data collection and assembly
- Maria Domenica Cappellini, John C. Wood, and Ali T. Taher were responsible for administrative support and helped in provision of study material and patients

4) **Results**. The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table):

- Khaled M. Musallam and Hani Tamim were responsible for statistical analysis and preparation of tables and figures
- Khaled M. Musallam, Maria Domenica Cappellini, John C. Wood, and Ali T. Taher were responsible for data analysis and interpretation

5) **Writing the manuscript**. The following authors were responsible for writing the manuscript:

- Khaled Musallam was responsible for writing the first draft
- Maria Domenica Cappellini, John C. Wood, Irene Motta, Giovanna Graziadei, Hani Tamim, and Ali T. Taher revised and edited the manuscript for intellectual content

6) **Contributors Listed in Acknowledgments**:

This study did not receive external funding or writing/editorial assistance. We thank Professor Sir David J. Weatherall (Weatherall Institute of Molecular Medicine, University of Oxford, OX, UK) for his review and thoughtful comments on this work.
