Manuscript no. HAEMATOL/2011/051433 entitled "Evidence for a role of anti-ADAMTS13 autoantibodies despite normal ADAMTS13 activity in recurrent thrombotic thrombocytopenic purpura"

Authors: Rahel Froehlich-Zahnd, James N. George, Sara K. Vesely, Deirdra R. Terrell, Khatira Aboulfatova, Jing-Fei Dong, Brenda M. Luken, Jan Voorberg, Ulrich Budde, Irmela Sulzer, Bernhard Lämmle, Johanna A. Kremer Hovinga

Information about the contributions of each person named as having participated in the study

- 1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:
- Johanna A. Kremer Hovinga, MD; University Clinic of Hematology and Central Hematology Laboratory Inselspital, Bern University Hospital and the University of Bern, CH-3010 Bern Phone: ++41 31 632 90 22; Fax: ++41 31 632 18 82; e-mail: johanna.kremer@insel.ch
- Bernhard Lämmle, MD; University Clinic of Hematology and Central Hematology Laboratory Inselspital, Bern University Hospital and the University of Bern, CH-3010 Bern

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): "Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship".

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

- 2) Authors who participated in the conception of the study: Rahel Froehlich-Zahnd, Bernhard Lämmle, Johanna A. Kremer Hovinga, James N. George
- 3) Design & Methods. The following authors were responsible for specific investigations (please detail):
- Rahel Froehlich-Zahnd developed and performed the FRETS-VWF73 ADAMTS13 assay, the flowbased ADAMTS13 activity assay, the dot-immunobinding assay and assisted in doing the VWF multimer analysis, ELISAs and quantitative immunoblotting assay for ADAMTS13 activity.
- Irmela Sulzer performed the quantitative immunoblotting assay; the ELISAs and VWF multimer analysis.
- Johanna A. Kremer Hovinga performed the FRETS-VWF73 ADAMTS13 assay, epitope mapping using recombinant ADAMTS13 fragments and the protein G-sepharose experiments and supervised experiments performed by Rahel Froehlich-Zahnd and Irmela Sulzer.
- James N. George, Sara K. Vesely, and Deirdra R. Terrell took care of the patient, collected patient's blood samples and provided clinical information and routine laboratory parameters.
- Khatira Aboulfatova, and Jing-Fei Dong (together with Rahel Froehlich-Zahnd) performed the flow-based ADAMTS13 assay.
- Brenda M. Luken, and Jan Voorberg (together with Johanna A. Kremer Hovinga) performed the epitope mapping using recombinant ADAMTS13 fragments.
- Ulrich Budde (and Irmela Sulzer) performed VWF multimer analysis.
- 4) **Results**. The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table):
- James N. George, Sara K. Vesely, and Deirdra R. Terrell are responsible for the clinical and laboratory information presented in table 1.

- Rahel Froehlich-Zahnd, Irmela Sulzer, Khatira Aboulfatova (flow-based assay results), Jing-Fei Dong (flow-based assay results), Ulrich Budde (VWF multimer analysis) and Johanna A. Kremer Hovinga are responsible for the data presented in table 2.
- Rahel Froehlich-Zahnd and Johanna A. Kremer Hovinga are responsible for the data in figure 1 and 24
- Johanna A. Kremer Hovinga, Brenda M. Luken and Jan Voorberg are responsible for the data presented in figure 2B.
- Johanna A. Kremer Hovinga is responsible for the data presented in figure 3.
- 5) Writing the manuscript. The following authors were responsible for writing the manuscript:
- Johanna A. Kremer Hovinga wrote the manuscript.
- Rahel Froehlich-Zahnd, James N. George and Bernhard Lämmle provided editorial help.
- All co-authors approved the final manuscript.

6) Contributors Listed in Acknowledgments:

We had no assistance with the study design, data collection, data analysis, or manuscript preparation other than declared in points 2-5.

The study was supported by grants from the Swiss National Science Foundation (grant 32003B-124892), the Mach-Gaensslen Foundation Switzerland, the Stiftung zur Förderung der wissenschaftlichen Forschung an der Universität Bern, the ISTH 2007 Presidential Fund and NIH grant HL071895.

TECHNOZYM® ADAMTS13 INH ELISA was a gift of Helga Vetr, Technoclone, Vienna, Austria and recombinant ADAMTS13 a gift of Fritz Scheiflinger, Baxter Innovations GmbH, Vienna, Austria.
