

Manuscript no. HAEMATOL/2011/055269 entitled “Telomere length is associated with disease severity and declines with age in dyskeratosis congenita”

Authors: Blanche P. Alter, Philip S. Rosenberg, Neelam Giri, Gabriela M. Baerlocher, Peter M. Lansdorp, and Sharon A. Savage

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:

- Blanche P Alter, Clinical Genetics Branch, Division of Cancer Epidemiology and Genetics, National Cancer Institute, National Institutes of Health, Department of Health and Human Services, Rockville, MD, USA, alterb@mail.nih.gov

- Sharon A Savage, 1Clinical Genetics Branch, Division of Cancer Epidemiology and Genetics, National Cancer Institute, National Institutes of Health, Department of Health and Human Services, Rockville, MD, USA, savagesh@mail.nih.gov

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html): “*Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship*”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Blanche P Alter, Sharon A Savage, Philip S Rosenberg

3) Design & Methods. The following authors were responsible for specific investigations

- Blanche P Alter, Sharon A Savage, Philip S. Rosenberg, Neelam Giri, Gabriela M. Baerlocher, and Peter M. Lansdorp participated in designing and analyzing the research.

- Sharon A Savage was responsible for analyses of DC genes

- Neelam Giri was responsible for clinical support of all subjects

- Philip S Rosenberg and Blanche P Alter were responsible for statistical analyses

- Gabriela M. Baerlocher and Peter M. Lansdorp were responsible for the telomere length assays

4) Results. The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table):

- Blanche P Alter was responsible for all tables and figures

5) Writing the manuscript. The following authors were responsible for writing the manuscript:

- Blanche P Alter, Sharon A Savage and Philip S. Rosenberg were responsible for writing the paper

- Neelam Giri, Gabriela M. Baerlocher and Peter M. Lansdorp were responsible for revising and checking the manuscript

6) Contributors Listed in Acknowledgments:

- Mark H Greene, MD, Chief, Clinical Genetics Branch, Division of Cancer Epidemiology and Genetics, National Cancer Institute, National Institutes of Health, Department of Health and Human Services, Rockville, MD, USA provided helpful discussions and advice

- Irma Vulto, Repeat Diagnostics, Vancouver, BC, Canada performed and interpreted the telomere length assays

- Lisa Leathwood, RN, Westat, Inc, Rockville, MD, USA coordinated subject participation in the National Cancer Institute Inherited Bone Marrow Failure Syndrome cohort
- Research was supported in part by the Intramural Research Program of the National Institutes of Health and the National Cancer Institute (BPA, NG, SAS, PSR),
- Contracts N02-CP-91026, N02-CP-11019 and HHSN261200655001C were with Westat, Incorporated.
- GMB was supported by the Swiss National Foundation and the Bernese Cancer League.
- Work in the Lansdorp laboratory was supported by grants from the Canadian Institutes of Health Research (RMF-92093), the NIH (R01GM094146), the Canadian Cancer Society and the Terry Fox Foundation (018006 and 105265)
