

**Manuscript no. HAEMATOL/2011/053348 entitled “Decrease in JAK2<sup>V617F</sup> allele burden is not a prerequisite to clinical response in patients with polycythemia vera”**

**Authors Emil Kuriakose, Katherine Vandris, Y. Lynn Wang, William Chow, Amy V. Jones, Paul J. Christos, Nicholas C.P. Cross, and Richard T. Silver**

**Information about the contributions of each person named as having participated in the study**

**1) Guarantor(s)**, i.e., person(s) who is (are) responsible for the integrity of the work as a whole:  
• Silver, Weill Cornell Medical College, rtsilve@med.cornell.edu

According to the International Committee of Medical Journal Editors (ICMJE) ([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)): “*Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 ..... Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship*”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

**2) Authors who participated in the conception of the study:** Emil Kuriakose, Katherine Vandris, Y. Lynn Wang, William Chow, Amy V. Jones, Paul J. Christos, Nicholas C.P. Cross, and Richard T. Silver

**3) Design & Methods.** The following authors were responsible for specific investigations  
• Silver and Kuriakose were responsible for design, patient care, methods, analyzing data, writing and reviewing manuscript.  
• Vandris and Chow were responsible for collecting and analyzing data.  
• Jones, Wang and cross were responsible for performing laboratory studies, analyzing data, and reviewing manuscript.  
• Christos was responsible for analyzing data, approved tables and figures and reviewing manuscript.

**4) Results.** The following authors were responsible for specific portions of the results, including figures and tables.  
• Kuriakos, Christos and Silver were responsible for all tables and figures.

**5) Writing the manuscript.** The following authors were responsible for writing the manuscript:  
• Kuriakos and Silver were responsible for writing the manuscript.

**6) Contributors Listed in Acknowledgments:**  
Funded in part by the Cancer Research and Treatment Fund, New York, NY
