

Manuscript no. HAEMATOL/2011/049403 entitled “Natural and engineered carboxy-terminal variants: decreased secretion and gain-of-function result in asymptomatic coagulation factor VII deficiency”

Authors: Alessio Branchini, Lara Rizzotto, Guglielmo Mariani, Mariasanta Napolitano, Mario Lapecorella, Muriel Giansily-Blaizot, Rosella Mari, Alessandro Canella, Mirko Pinotti, Francesco Bernardi

Information about the contributions of each person named as having participated in the study

1) Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:

- Mirko Pinotti, Dipartimento di Biochimica e Biologia Molecolare and LTTA Centre, Università degli Studi di Ferrara, pnm@unife.it
- Francesco Bernardi, Dipartimento di Biochimica e Biologia Molecolare and LTTA Centre, Università degli Studi di Ferrara, ber@unife.it

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “*Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship*”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the conception of the study: Mirko Pinotti, Francesco Bernardi

3) Design & Methods. The following authors were responsible for specific investigations and in particular:

- Alessio Branchini, Lara Rizzotto, Alessandro Canella and Rosella Mari were responsible for protein and functional assays in plasma and with recombinant proteins;
- Mariasanta Napolitano, Mario Lapecorella and Muriel Giansily-Blaizot were responsible for patients examination, coagulation assays and determination of coagulation factor levels;
- Mirko Pinotti and Francesco Bernardi were responsible for the design of experimental strategies

4) Results. The following authors were responsible for specific portions of the analysis and interpretation of results, including preparation of figures:

- Alessio Branchini, Mirko Pinotti, Francesco Bernardi and Guglielmo Mariani were responsible for analysis and interpretation of experimental data;
- Alessio Branchini was responsible for the figures.

5) Writing the manuscript. The following authors were responsible for writing the manuscript:

- Mirko Pinotti and Francesco Bernardi

6) Contributors Listed in Acknowledgments:

Angelika Batorova provided us with samples from a patient homozygous for the p.A354V-p.P464Hfs† mutation, used as control in the study. Alain Marques-Verdiez collected clinical data for the French patient.
