

Manuscript no. HAEMATOL/2012/064576 entitled "Early interim 2-(1)Fluoro-2-Deoxy-D-Glucose positron emission tomography is prognostically superior to peripheral blood lymphocyte/monocyte ratio at diagnosis in classical Hodgkin's lymphoma".

Authors: Alessandra Romano, Calogero Vetro, Daniela Donnarumma, Stefano Forte, Massimo Ippolito and Francesco Di Raimondo¹

Information about the contributions of each person named as having participated in the study

Guarantor(s), i.e., person(s) who is (are) responsible for the integrity of the work as a whole:

- Alessandra Romano, Department of Clinical and Molecular Biomedicine, Hematology Section, University of Catania, ITALY, sandrina.romano@gmail.com

According to the International Committee of Medical Journal Editors (ICMJE)

(http://www.icmje.org/ethical_1author.html): "Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship".

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the **conception of the study**: Alessandra Romano, Francesco Di Raimondo

3) **Design & Methods**. The following authors were responsible for specific investigations (please detail):

- Alessandra Romano and Calogero Vetro were responsible for response to therapy analysis
- Daniela Donnarumma and Stefano Forte were responsible for survival data
- Massimo Ippolito performed PET survey and correlations to biological parameters in HL

4) **Results**. The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table):

- Stefano Forte and Daniela Donnarumma were responsible for survival analysis (Figure 1)
- Calogero Vetro and Alessandra Romano were responsible for response analysis (Table 1)

5) **Writing the manuscript**. The following authors were responsible for writing the manuscript:

- Alessandra Romano and Francesco Di Raimondo wrote the manuscript
