

Manuscript no. HAEMATOL/2011/054254 entitled “Natural Killer Cell Lines Preferentially Kill Clonogenic Multiple Myeloma Cells and Decrease Myeloma Engraftment in a Bioluminescent Xenograft Mouse Model”

Authors: Brenna E. Swift, Brent A. Williams, Yoko Kosaka, Xing-Hua Wang, Jeffrey A. Medin, Sowmya Viswanathan, Joaquin Martinez-Lopez, and Armand Keating

Information about the contributions of each person named as having participated in the study

1) **Guarantor(s)**, i.e., person(s) who is (are) responsible for the integrity of the work as a whole:

- Armand Keating MD Cell Therapy Program, Princess Margaret Hospital, Toronto, ON, Canada; armand.keating@uhn.on.ca

According to the International Committee of Medical Journal Editors (ICMJE) (http://www.icmje.org/ethical_1author.html): “*Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship”.*

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the **conception of the study**: Brenna Swift, Brent Williams, Armand Keating,

3) **Design & Methods**. The following authors were responsible for specific investigations

- Brenna Swift was responsible for the design of most of the experiments
- Brent Williams contributed to the design of clonogenic studies
- Xing-Hua Wang contributed to methodology of clonogenic assays

4) **Results**. The following authors were responsible for specific portions of the results, including figures and tables.

- Brenna Swift was responsible for each figure and each table.
- Brenna Swift conducted the majority of the experimental work and data analysis
- Brent Williams was responsible for assisting in data analysis
- Brenna Swift, Yoko Kosaka, Jeffrey A. Medin, Joaquin Martinez-Lopez, Sowmya Viswanathan and Armand Keating participated in experimental design
- Xing-Hua Wang performed some of the methylcellulose clonogenic assays and assisted in the replating assays.

5) **Writing the manuscript**. The following authors were responsible for writing the manuscript:

- Brenna Swift was responsible for preparation, ongoing revision and the final version of the manuscript
- Brent Williams, Yoko Kosaka, Jeffrey A. Medin, Joaquin Martinez-Lopez, Sowmya Viswanathan and Armand Keating contributed to manuscript preparation
- Armand Keating revised and approved submitted the manuscript

6) **Contributors Listed in Acknowledgments**:

This work was supported by the Philip S Orsino Translational Research Laboratory and by a grant from the Ontario Institute for Cancer Research.
