According to the International Committee of Medical Journal Editors (ICMJE)

([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)): “*Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 ..... Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship*”.

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the **conception of the study**: Christoph Renner, Pier Luigi Zinzani, Rémy Gressin, Dirk Klingbiel, Sergio Cogliatti, Francesco Bertoni, Michele Ghielmini, Peter Brauchli and Nicolas Ketterer

3) **Design & Methods**. The following authors were responsible for specific investigations (please detail):

- Christoph Renner recruited and treated patients, data acquisition and analysis
- Pier Luigi Zinzani recruited and treated patients, data acquisition and analysis
- Rémy Gressin recruited and treated patients, data acquisition and analysis
- Dirk Klingbiel data acquisition and statistical analysis
- Pierre-Yves Dietrich recruited and treated patients, data acquisition and analysis
- Felicitas Hitz recruited and treated patients, data acquisition and analysis
- Mario Bargetzi recruited and treated patients, data acquisition and analysis
- Walter Mingrone recruited and treated patients, data acquisition and analysis
- Giovanni Martinelli recruited and treated patients, data acquisition and analysis
- Andreas Trojan recruited and treated patients, data acquisition and analysis
- Krimo Bouabdallah recruited and treated patients, data acquisition and analysis
- Andreas Lohri recruited and treated patients, data acquisition and analysis
- Emmanuel Gyan recruited and treated patients, data acquisition and analysis
- Christine Biaggi data acquisition and statistical analysis
- Sergio Cogliatti pathology review, molecular analysis
- Francesco Bertoni molecular and data acquisition + analysis
- Michele Ghielmini recruited and treated patients, data acquisition and analysis
- Peter Brauchli designed study, data analysis and statistical analysis
- Nicolas Ketterer recruited and treated patients, data acquisition and analysis

4) **Results**. The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table):

- As listed before, all authors except Ms. Biaggi were involved in patient acquisition and treatment. Therefore, all the primary data were generated by the team. Ms. Biaggi was responsible for data collection, verification and composition of initial figures. The molecular/pathology analysis was done by Dr. Cogliatti/Dr. Bertoni and their teams. The figures/tables were composed by Dr. Renner and Dr. Klingbiel. Minor corrections and final approval was finally done by all co-authors.

5) **Writing the manuscript**. The following authors were responsible for writing the manuscript:

- Christoph Renner, Rémy Gressin, Dirk Klingbiel, Sergio Cogliatti, Francesco Bertoni and Nicolas Ketterer wrote the first draft of the manuscript which was then corrected/amended by all co-authors and, finally, approved.

6) **Contributors Listed in Acknowledgments**:

We would like to acknowledge the SAKK team, the data manager of the GOELAMS group, Mrs Valérie Rolland, and the local investigators/nurses for collecting and validating all the data. We would like to thank Volker Thiel, Diana Förbs, Claudia Zimmermann and Doris Kradolfer (all Kantonsspital St.Gallen, St.Gallen, Switzerland) for DNA and FISH analysis. The study was supported in part by Novartis Pharma Schweiz AG, the Swiss State Secretariat for Education and Research (SER) and the Fondazione per la Ricerca e la Cura sui Linfomi (FB).
