According to the International Committee of Medical Journal Editors (ICMJE)

([http://www.icmje.org/ethical\\_1author.html](http://www.icmje.org/ethical_1author.html)): "Authorship credit should be based on: 1) substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data; 2) drafting the article or revising it critically for important intellectual content; and 3) final approval of the version to be published. Authors should meet conditions 1, 2, and 3 ..... Acquisition of funding, collection of data, or general supervision of the research group alone does not constitute authorship".

The guarantors of this manuscript confirm that all persons designated as authors qualify for authorship, and that each author has participated sufficiently in the work to take public responsibility for appropriate portions of the content.

2) Authors who participated in the **conception of the study**: Robert Wynn, Ed Wraith, Brian Bigger, Simon Jones

3) **Design & Methods**. The following authors were responsible for specific investigations (please detail):

- Muhammad Saif did the antibody assays with Karen Brookes
- Supervise directly by Brian Bigger and Robert Wynn
- The metabolic non antibody assays were performed in the Willink laboratories with Heather Church and Karen Tylee
- Ed Wraith and Simon Jones with Robert Wynn and Denise Bonney with Jean Mercer counselled, consented and sampled patients and participated in research design

4) **Results**. The following authors were responsible for specific portions of the results, including figures and tables (please indicate the person responsible for each figure and each table):

- Results of antibodies were initially collated by Muhammad Saif, Robert Wynn and Brian Bigger with Karen Brookes
- Metabolic assays were reported by Heather Church and Karen Tylee
- Ed Wraith and Simon Jones along with Robert Wynn, Brian Bigger and Denise Bonney related clinical events to these laboratory assays

5) **Writing the manuscript**. The following authors were responsible for writing the manuscript:

- All authors significantly contributed to the final manuscript

6) **Contributors Listed in Acknowledgments**: N/A
